Contents

	Page
Introduction	1
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Specimen	2
4.1 Shape and dimensions of specimen	2
4.2 Preparation of specimen	2
4.3 Number of specimens	3
4.4 Curing and storage method until material ageing before loading start of specimen	3
5 Loading apparatus	3
6 Loading method	4
7 Measurement	5
7.1 Specimen for measuring strain	5
7.2 Measuring length of strain	5
7.3 Measuring position of strain	5
7.4 Measuring method of strain	5
7.5 Measuring timing of strain during period of loading duration	5
7.6 Measuring timing of strain at unloading and after unloading	5
7.7 Period of loading duration	5
8 Calculation of results	6
8.1 Obtaining method for each strain, etc.	6
8.2 Illustration of results and obtaining method for formula of creep curve	6
9 Report	7

Foreword

This translation has been made based on the original Japanese Industrial Standard established by the Minister of Land, Infrastructure, Transport and Tourism through deliberations at the Japanese Industrial Standards Committee according to the proposal for establishment of Japanese Industrial Standard submitted by Japan Concrete Institute (JCI) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law.

This **JIS** document is protected by the Copyright Law.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.
