Foreword

This translation has been made based on the original Japanese Industrial Standard established by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee according to the proposal of establishing a Japanese Industrial Standard from Japan Construction Mechanization Association (JCMA)/Japanese Standards Association (JSA) with a draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law.

This Standard has been made based on **ISO 10263-6 : 1994** *Earth-moving machinery—Operator enclosure environment—Part 6: Determination of effect of solar heating on operator enclosure* for the purpose of making it easier to compare this Standard with International Standard; to prepare Japanese Industrial Standard conforming with International Standard; and to propose a draft of an International Standard which is based on Japanese Industrial Standard.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.

JIS A 8330 consists of the following 6 parts under the general title “*Earth-moving machinery—Operator enclosure environment—*”:

Part 1: General and definitions

Part 2: Air filter test

Part 3: Operator enclosure pressurization test method

Part 4: Operator enclosure ventilation, heating and/or air conditioning test method

Part 5: Windscreen defrosting system test method

Part 6: Determination of effect of solar heating on operator enclosure

Date of Establishment: 2006-03-25

Date of Public Notice in Official Gazette: 2006-03-27

Investigated by: Japanese Industrial Standards Committee

Standards Board

Technical Committee on Industrial Machinery
