## Foreword

This translation has been made based on the original Japanese Industrial Standard established by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee according to the proposal of establishing a Japanese Industrial Standard from The Japan Research Institute for Screw Threads and Fasteners (JFRI)/the Japanese Standards Association (JSA), with a draft of Industrial Standard based on the provision of Article 12 Clause 1 of the Industrial Standardization Law.

By this Standard, **JIS B 0205:1997** and **JIS B 0207:1982** were withdrawn and replaced with **JIS B 0205 Part 1** to **Part 4**.

This Standard has been made based on **ISO 261:1998** *ISO general purpose metric screw threads—General plan* for the purposes of making easy to compare this Standard with International Standard; to prepare Japanese Industrial Standard conforming with International Standard; and to propose a draft of International Standard which is based on Japanese Industrial Standard.

**JIS B 0205** series consist of 4 parts with the title of *ISO general purpose metric screw threads*.

JIS B 0205-1 *Part 1: Basic profile*

JIS B 0205-2 *Part 2: General plan*

JIS B 0205-3 *Part 3: Selected sizes for screws, bolts and nuts*

JIS B 0205-4 *Part 4: Basic dimensions*

Date of Establishment: 2001-12-20

Date of Public Notice in Official Gazette: 2001-12-20

Investigated by: Japanese Industrial Standards Committee  
Standards Board

Technical committee on Machine Elements

## ISO general purpose metric screw threads — Part 2: General plan

**Introduction** This Japanese Industrial Standard has been prepared based on the second edition of **ISO 261** *ISO general purpose metric screw threads — General plan* published in 1998 without modifying the technical contents.

**1 Scope** This Standard specifies ISO general purpose metric screw threads (M) having basic profile according to **JIS B 0205-1**. Basic dimensions are given in **JIS B 0205-4**. For tolerances see **JIS B 0209-1**.

Remarks: The International Standard corresponding to this Standard is as follows.

In addition, symbols which denote the degree of correspondence in the contents between the relevant International Standard and JIS are IDT (identical), MOD (modified), and NEQ (not equivalent) according to **ISO/IEC Guide 21**.

ISO 261:1998 *ISO general purpose metric screw threads — General plan* (IDT)

**2 Normative references** The following standards contain provisions which, through reference in this Standard, constitute provisions of this Standard. The most recent editions of the standards (including amendments) shall be applied.

JIS B 0101 *Screw threads and fasteners — Vocabulary*

Remarks: The items cited from **ISO 5408:1983** *Cylindrical screw threads — Vocabulary* are equivalent to the corresponding matters of the said standard.

JIS B 0205-1 *ISO general purpose metric screw threads — Part 1: Basic profile*

Remarks: **ISO 68-1:1998** *ISO general purpose screw threads — Basic profile — Part 1: Metric screw threads* is identical with the said standard.

JIS B 0205-4 *ISO general purpose metric screw threads — Part 4: Basic dimensions*

Remarks: **ISO 724:1993** *ISO general-purpose metric screw threads — Basic dimensions* is identical with the said standard.

JIS B 0209-1 *ISO general purpose metric screw threads — Tolerances — Part 1: Principles and basic data*

Remarks: **ISO 965-1:1998** *ISO general purpose metric screw threads — Tolerances — Part 1: Principles and basic data* is identical with the said standard.

**3 Definitions** For the purposes of this Standard, the definitions given in **JIS B 0101** apply.

**4 Designation** A screw thread in conformity with this Standard shall be designated according to **JIS B 0209-1**.
