Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee, as the result of proposal for revision of Japanese Industrial Standard submitted by The Japanese Electric Wire & Cable Maker's Association (JCMA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14. Consequently **JIS C 3662-4 : 1998** is replaced with this Standard.

This revision has been made based on **IEC 60227-4 : 1992 Polyvinyl chloride insulated cables of rated voltages up to and including 450/750 V—Part 4 : Sheathed cables for fixed wiring** for the purposes of making it easier to compare this Standard with International Standard; to prepare Japanese Industrial Standard conforming with International Standard; and to propose a draft of an International Standard which is based on Japanese Industrial Standard.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.

JIS C 3662 consists of the following 7 parts under the general title *Polyvinyl chloride insulated cables of rated voltages up to and including 450/750 V*.

Part 1 : General requirements

Part 2 : Test methods

Part 3 : Non-sheathed cables for fixed wiring

Part 4 : Sheathed cables for fixed wiring

Part 5 : Flexible cables (cords)

Part 6 : Lift cables and cables for flexible connections

Part 7 : Flexible cables screened and unscreened with two or more conductors

Date of Establishment: 1998-03-20

Date of Revision: 2003-10-20

Date of Public Notice in Official Gazette: 2003-10-20

Investigated by: Japanese Industrial Standards Committee
Standards Board

Technical Committee on Electricity Technology
