Method of 65 per cent nitric acid
test for stainless steels

ICS 77.060; 77.140.20

Descriptors : stainless steels, corrosion-resistant steels, corrosion tests, physico-chemical methods, nitric acid, nitrogen inorganic compounds, inorganic acids

Reference number : JIS G 0573 : 1999 (E)

G 0573 : 1999

Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of International Trade and Industry through deliberations at Japanese Industrial Standards Committee in accordance with the Industrial Standardization Law. Consequently **JIS G 0573 : 1980** is replaced with **JIS G 0573 : 1999**.

In this revision, the comparison and conformity with International Standard (ISO 3651-1) are executed and this text was prepared for a proposal document of International Standard.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.

Date of Establishment: 1970-01-01

Date of Revision: 1999-03-20

Date of Public Notice in Official Gazette: 1999-03-23

Investigated by: Japanese Industrial Standards Committee
Divisional Council on Iron and Steel

JIS G 0573 : 1999, First English edition published in 2000-05
