General rules for chemical analysis of nickel and nickel alloys

ICS 77.120.40

Descriptors : nickel, nickel alloys, castings, quantitative analysis, chemical analysis
and testing

Reference number : JIS H 1270 : 1998 (E)

H 1270 : 1998

Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of International Trade and Industry through deliberations at Japanese Industrial Standards Committee in accordance with the Industrial Standardization Law. Consequently **JIS H 1270 : 1988** is replaced with **JIS H 1270 : 1998**.

In this revision, in order to make comparison of **JIS** with **ISO**, prepare **JIS** conforming to **ISO** and make it easy to propose the original plan to **ISO**, coordination with the corresponding **ISO** standards is performed in a series of constitution determining method standards, and revisions following them are performed.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.

Date of Establishment: 1988-08-01

Date of Revision: 1998-08-20

Date of Public Notice in Official Gazette: 1998-08-20

Investigated by: Japanese Industrial Standards Committee
Divisional Council on Non-Ferrous Metals
