Carbon black for rubber industry— Characteristics of pelletized carbon black—Part 3 : Determination of individual pellet crushing strength

ICS 83.040.20

Reference number : JIS K 6219-3 : 2006 (E)

Foreword

This translation has been made based on the original Japanese Industrial Standard established by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for establishment of Japanese Industrial Standard submitted by The Japan Rubber Manufacturers Association (JRMA)/Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law.

Consequently **JIS K 6219**: 1997 is replaced with **JIS K 6219-1**, **JIS K 6219-2**, **JIS K 6219-3** and **JIS K 6219-4**.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.

JIS K 6219 consists of the following 4 parts under the general title “*Carbon black for rubber industry—Characteristics of pelletized carbon black*”:

Part 1: Determination of fines content

Part 2: Determination of pour density

Part 3: Determination of individual pellet crushing strength

Part 4: Determination of pellet size distribution

Date of Establishment: 2006-02-20

Date of Public Notice in Official Gazette: 2006-02-20

Investigated by: Japanese Industrial Standards Committee

Standards Board

Technical Committee on Chemical Products
