Copper and copper alloy
gas welding rods

ICS 25.160.20

Descriptors : copper, copper alloys, welding rods, gas welding

Reference number : JIS Z 3202 : 1999 (E)

Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of International Trade and Industry through deliberations at the Japanese Industrial Standards Committee in accordance with the Industrial Standardization Law. Consequently **JIS Z 3202 : 1983** is replaced with **JIS Z 3202 : 1999**.

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.

This revision employs **JIS Z 3200 : 1999** *Welding consumables—Technical delivery conditions for welding filler metals—Type of product, dimensions, tolerances and marking* as the normative reference.

Date of Establishment: 1959-09-01

Date of Revision: 1999-09-20

Date of Public Notice in Official Gazette: 1999-09-20

Investigated by: Japanese Industrial Standards Committee
Divisional Council on Welding
